

About the database:

The home page which is the (index.php) contains all the relevant forms for Canary Conoe. They all contain their own submit button underneath which will direct you to a new page to show the result.

The “Next” button which will be seen on the new page that contains the database result leads you back to the home page.

Errors

Throughout the validation process I encountered the same errors that I was unable to fix. These two errors that consisted of : The stray end tag (</head>) and the start tag “body” being seen but an element of the same type was already open.

The social media links (icons) within the footer do not work.

For the member participation/result (Query 8)

If the member has been entered in a race but not yet participated the race , they are not shown on the screen however the table heading displays on the screen instead.

Addition Features:

Footer

Header with a logo

When inserting information within the forms, the text colour changes AS well as the submit buttons.
